

Medical Research Future Fund 10-year plan

The Australian Government announced a \$5 billion, 10-year investment plan for the Medical Research Future Fund (MRFF) as part of the 2019–20 Budget. The 10-year plan provides secure funding to support lifesaving research, create jobs, strengthen industry, and reaffirm Australia’s reputation as a world leader in medical research.

Developing new drugs, devices, treatments and cures may take more than a decade. This 10-year investment plan gives researchers and industry certainty and direction, supporting them to tackle areas of unmet need and excel in collaborative and transformative research.

MRFF activities are based on areas of national priority identified by an expert advisory board and widespread consultation. Activities put patients at the core and focus on translating research into practice so that all Australians can benefit. MRFF funding is directed into 4 themes.

Funding themes

 Patients	Funding innovative treatments, supporting clinical trials, and delivering more advanced health care and medical technology to improve the health of all Australians
 Researchers	Supporting our researchers to make breakthrough discoveries, develop their skills and progress their careers in Australia
 Research missions	Helping researchers think big to tackle significant health challenges through investment, leadership and collaboration
 Research translation	Moving research ideas from the lab to the clinic, so that medical discoveries become part of clinical practice for GPs, specialists and hospitals

There are 20 initiatives under these themes, funded over 10 years to harness innovation, provide vital infrastructure, improve patient outcomes, and generate jobs and economic growth.

Today’s research is tomorrow’s health care. There is no better way to ensure Australians receive the highest quality health care than by investing in medical research.

Today’s
research is
tomorrow’s
health care.
